Eli Cobler

918-500-6771 · ecobler11@gmail.com · elicobler.dev · github.com/eli-cobler

3CX Basic and Advanced certified engineer who has installed, migrated, and supported 3CX phone systems since 2018, working with 10–20 SIP trunk providers. Also a software developer with experience in server administration, networking, and back-end web development.

Experience

Software Developer / VoIP Implementation Engineer Aug 2020 – Present
LISS Technologies · Long Island, NY

Developer responsibilities include producing clean, efficient code based on specifications, testing, deploying programs and systems, as well as improving existing software. Implementation Engineer responsibilities include identifying how performance can be improved, and installation and maintenance of 3CX instances, as well as supporting and managing the 3CX VoIP phone systems.

Software Developer / Network Admin May 2018 – Aug 2020
Spark Services · Muskogee, OK

Developer responsibilities include producing clean, efficient code based on specifications, testing, deploying programs and systems, as well as improving existing software. Admin responsibilities include identifying how performance can be improved, and installation and maintenance of computer networks and systems, as well as supporting, installing, and managing 3CX VoIP phone systems.

Back End Developer May 2017 – Aug 2020
Stone Moss Group · Tulsa, OK

Involved in company growth through technological resources. Responsible for writing the web services and APIs used by front-end developers, integrating front-end work, and applying server-side web application logic.
